

**MICHAEL BECK**  
Consultant

## **EXPERIENCE**

Mr. Beck has extensive executive management experience including project management, environmental engineering, regulatory compliance, environmental permitting, strategic planning, business development, international and domestic marketing and sales, and operations.

As Vice President, he was responsible for operations of an engineering consulting firm specializing in environmental, property conditions, and ADA compliance assessments/audits, in addition to operation and maintenance programs, Phase II ESA evaluations, remediation programs, repair inspections, and special engineering assignments for industrial and commercial clients.

As Executive Vice President of a full service engineering and consulting firm, he was responsible for sales and marketing, strategic alliances, joint ventures, acquisitions, business development, and technology exchanges. Projects included environmental, materials handling and processing, infrastructure, and technology development projects and programs.

Mr. Beck was also Vice President of an international fuels supply and engineering consulting company, responsible for the executive management and company activities including operating management and technical personnel.
