

**PETER R. KRALLITSCH, Architect, P.E., S.E.
Consultant**

EXPERIENCE

Mr. Krallitsch is Founder and Principal of Peter Krallitsch & Associates with over 30 years of providing building services for municipal, commercial, industrial, health care, institutional, religious, and multi-family housing developments.

In addition to his experience as project manager, architect and engineer, he has been extensively involved in performing structural reviews of construction documents prepared by other architects and/or engineers for various types of structures. The purpose of these reviews is to analyze the structures, with an emphasis on code compliance, and to point out possible design deficiencies and potential construction problems to aid lending institutions in their investment decisions.

He also acts as Owner's Representative during the construction phase of projects. Services performed include construction observation, photographic documentation of progress, evaluation of test reports, evaluation of contractors' payment requests, etc.
