

THOMAS J. McCABE, P.E.
Principal

EXPERIENCE

Mr. McCabe has been engaged in the practice of Civil Engineering for over 45 years.

In 1979 he founded Seton Engineering to provide civil engineering services to industrial and residential developers as well as municipal and governmental agencies. He has acted as principal-in-charge on over 1,700 projects.

Mr. McCabe has been Project Manager and Chief Design Engineer for a wide range of planning, design, and construction management for government, private, commercial, institutional, and industrial clients. Projects have included utilities, highways and local streets, drainage and storm water management design, sewer systems, water mains, municipal and commercial parking lots, site developments, residential subdivisions, industrial parks, special studies, campus development and governmental projects.

Highway design experience includes the State of Illinois, county, and local roadways. In addition to civil engineering projects, Mr. McCabe has provided expert testimony before the Circuit Court of Cook, DuPage, and Lake Counties, the Zoning Board of Appeals of Cook, DuPage and Lake Counties, the Illinois Commerce Commission, and numerous zoning, planning and municipal boards and county agencies.
