

SETON ENGINEERING SERVICE CORPORATION

EXPERIENCE

Seton Engineering Service Corporation was established in 1979 by Thomas J. McCabe Sr. to provide civil engineering services to residential and industrial developers, commercial clients, and governmental agencies. Since our establishment, we have developed and maintained a reputation for quality engineering and service.

Our company is comprised of a team of well-qualified, experienced engineers who work closely with our clients in order to provide accurate, prompt and reliable service.

We strive to establish and incorporate new and innovative ideas into our plans and designs, while focusing on client objectives. The goal has led us to maintain a strong work ethic, resulting in a proven track record and a portfolio of successfully completed projects.
